Beyond Vendor: We're a Peer-to-Peer Collaborative Partner

Contextual Value

We don't sell CVs; we provide a value proposition that solves specific structural bottlenecks.

Total Accountability

We take full responsibility for execution and risk, moving beyond standard "slide-provider" consulting.

Non-Competitive Relationship:

We integrate seamlessly to help your existing leadership thrive—not threaten their jobs.

Leadership as a Service

Deep strategic oversight included at every tier.

The Problem:

Is Your Growth Hitting a "Technical Ceiling"?

Tool Sprawl Pit

Fragmented SaaS stacks can bleed \$30k+/mo in wasted "Franken-stack" fees and manual data entry.

Integration Gaps

Core platforms (Xero, HubSpot, Inventory) that refuse to talk to each other, creating operational silos.

The "Bus Factor"

Relying on a single freelancer creates a single point of failure. If they quit, your business stops.

Velocity Trap

Roadmaps delayed by months because your current IT/Web team lacks the scale for parallel workstreams.

Credibility Gap

Pitching to VCs or Boards without the technical believability to defend your long-term architecture.

Manual Choke

Growing fast, but your backend operations are choking on manual work that should be automated.

Leadership as a Service + Agile Execution

Build the Engine, Not the Band-Aid

You don't need another temporary fix. You need a dedicated engineering crew to build the integrated engine that powers your enterprise. We move beyond "Staff Augmentation" into Capability Expansion

The Solution: The "Enterprise DevPod™"

The DevPod™ Model:

We don't just do 'staff augmentation'; we deploy a cohesive delivery unit. You get a team, not a person.

* Commitment % will change depending on YOUR needs, and are based on a single 'classic' Pod. Multi- and Half-Pods are also available.

Advanced Operational Suite

Agentic Ops Overhaul

Replace tool sprawl with a bespoke, governed Agent Suite to automate your complex workflows.

Fractional CTO

Dedicated executive leadership to drive long-term strategy and internal engineering culture.

VC / Funding Review

Technical due diligence and architecture audits for Pre-seed, Seed, and Series A readiness.

Bespoke Buildouts

End-to-end delivery of complex, standalone software ecosystems from scratch.

Tech Stack Consolidation

Auditing and slimming down your tool sprawl to save \$20k+ in monthly recurring costs.

AI Governance

Ensuring your AI implementation is secure, ethical, and enterprise-ready.

Working Scaffolding in Days:

Live Prototypes in Days. The 30-Day Mockup Cycle is Dead

We don't waste time on static pictures. We use our Agentic AI suite to build usable assets from day one.

Interactive Alphas

From discovery call to functional prototype in 48-72 hours.

Live Scaffolding

Interact with the structural data models immediately.

Real-Time Steering

Approve foundations by clicking through real code, not looking at PDFs.

Absolute Asset Autonomy

Flex Scaling

Month-to-month flexibility. Pause, scale up, or scale down with 30 days' notice.
Half-pods available for tighter budgets.

Clean Handover

We document as we build. If you cancel, you receive a clean, usable codebase ready for an internal team. 100% IP ownership.

"You are never held hostage to our team. We win by adding value, not by locking you in."

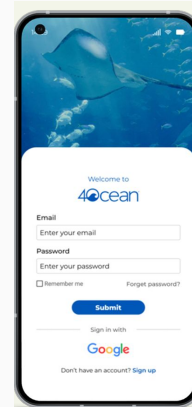

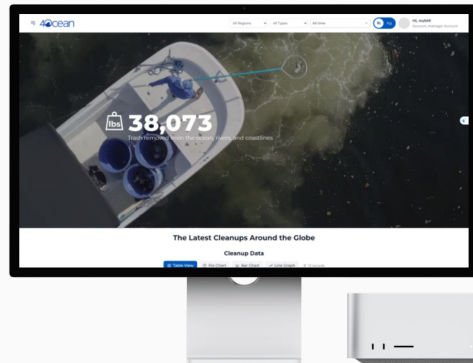

Examples of Our DevPod In Action:

Impact: Ocean Sustainability

Provenance Tracking

We built a non-financial blockchain utility to track the removal of plastic from the world's oceans.

Outcome

Reduced reporting time from weeks to self-serve, on-demand real-time dashboards.

Tech

Vchain-leveraged immutable ledger integration.

Impact

Validated removal metrics for 200+ global field staff.

Impact:

Scale & Security

\$100M+ Processed

Securing and scaling a transactional leasing platform with immutable audit trails.

Zero security breaches.

Enterprise-grade architecture.

Automated compliance reporting.

Full ERP MVP

Architected 4 pods (22 devs) to complete a powerful impact ERP system in under 12 months.

Parallel dev workstreams.

Unified data layer.

Agentic-boosted delivery.

Sample Pricing: The Enterprise DevPod™

Your Cohesive Delivery Unit

Base Pod: \$10,000 USD/mo

CTO-Level Architecture & Oversight

Every pod is overseen by our CTO to ensure enterprise-grade foundations.

Equivalent to 4 Full-Time Developer Output for unmatched velocity and parallel workstreams.

AI-Accelerated Velocity

Leveraging Agentic AI to handle "boring" code, maximizing human senior developer focus on complex logic.

Guaranteed 2-Developer Workstream

Ensures zero single points of failure, continuity, and shared knowledge.

Fully Managed Delivery

Dedicated Project Management and Technical Leadership are baked-in—no extra recruiting or HR costs.

1ZERO

Scaling up, Scaling down, & Offboarding

Clean Handover Guarantee

Because our code is heavily documented, if you choose to cancel, you receive a clean, fully usable codebase ready for your internal team to take over. You are never held hostage.

Additional Full Pods

Can be added for \$6,000 USD per month

Month-to-Month Flexibility

Pause, increase, decrease or cancel with 30 days' notice.

Long-Term and/or Large Scale Discounts

Large commitments allow for reductions in pricing

Half-pods available to accommodate smaller budgets.

A Structured Path to Project Success

We eliminate surprises and delays through a transparent, highly-engaged project lifecycle:

Phase 1

Deep Discovery & Blueprinting :

-  In-depth requirements gathering.
-  Wireframing, Prototyping, and UI/UX Mockups.
-  SME Approval and Sign-off before any code is written.

Phase 2

Agentic Development :

-  Work conducted in fast-paced, two-week Sprints.
-  Clear timeline for the full project scope.
-  Delivery via one or multiple DevPods, scaled to your needs.

Radical Alignment & Governance

Transparency & Quality: No Surprises
Full Participation. No Waterfall Surprises.

Client Participation Rights

You have a seat at the table in all key sessions.

Full Transparency

Participate in our **Sprint Planning** and **Sprint Review** sessions.

Continuous Control

Prioritize, de-scope, and approve features in real-time to keep the project on track.

Quality & Velocity

The perfect hybrid combination of high-quality Human Dev, Agentic Dev, and AI-leveraged builds, maximizing efficiency and leveraging your internal knowledge.

Real-Time Daily Communication

We don't just talk at Sprint Reviews. We integrate directly into your preferred communication channels (Slack/Teams) for daily, real-time collaboration.

100% IP & Code Ownership

You own everything we build from Day 1. Enterprise-grade security and strict NDAs are standard.

More Than Just DevPods

Advanced Solutions for Scaling & Capital Readiness

✓ Agentic Ops Overhaul

Build an AI-powered operational system that replaces disconnected SaaS workflows.

✓ Fractional CTO & Advisory

Executive-level technical leadership aligned with your business strategy.

✓ Funding & Tech Review

Technical due diligence and investor-ready architecture validation.

✓ Bespoke Software Buildouts

End-to-end custom software ecosystems built for scale.

Stop Guessing Start Building

Not sure what to build first?

We offer a "**Free Operational Architecture Review.**"

Share your idea, your struggles, your project, we'll sort out the tech stack and
